## PRESIDENT'S MESSAGE

By Elizabeth Bucciarelli

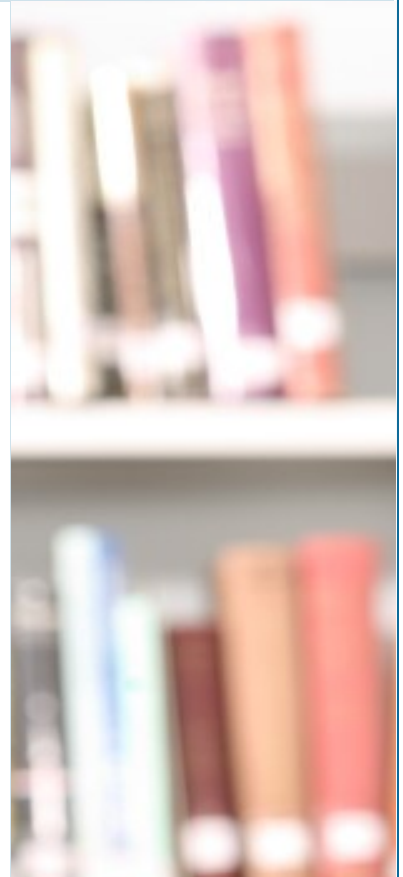

### Memorializing MDMLG President, Margaret Danowski

As many of you know, our organization lost our wonderful President, colleague, and friend, Margaret Danowski, on Tuesday, October 25, 2022. On the next page of this issue is a brief biography of Margaret.

As an organization, we sent a sympathy card and a plant to her family. However, our association wanted to honor Margaret's memory in a more enduring way that would highlight her generous nature and dedication to professional service organizations. After much discussion, the Executive Board unanimously voted to rename the current MDMLG Student Scholarship Award to *The Margaret Danowski Student Scholarship Award*. Her family was notified of this memorial to her in early January 2023.

I want to thank the entire MDMLG Executive Board for their concern, ideas, input, and swift decision-making to help create this lasting memorial to Margaret from our association.

I also want to thank the Executive Board for their support as I complete Margaret's term as MDMLG President. Everyone on the Board has been very generous with their time as well as patient with my many questions.

## REMEMBERING MARGARET DANOWSKI

By Elizabeth Bucciarelli

It is with a heavy heart that I convey to you that our current Metropolitan Detroit Medical Library Group (MDMLG) President, colleague and friend, Margaret Danowski, passed away on Tuesday, October 25, 2022.

Margaret was the Health Professions Librarian at Central Michigan University's Park Library since 2019. Before working at Central Michigan University, she worked for 23 years as an Assistant Professor and IT/Reference Librarian at Madonna University in Livonia, MI, where she was the Liaison to the College of Nursing and Health. In her early career, Margaret worked as a part-time librarian for a dental supply company in Romulus, MI, as well as a library technical assistant at the Oakland County Law Library.

Her early dream was to become an archaeologist. After completing her Bachelor's degree in Classical Archaeology and Cultural Anthropology (1985) at the University of Michigan, Margaret enrolled in an art history graduate program in North Carolina where she studied ancient art. She returned to Michigan and worked as a serials and routing clerk at a law library in the metropolitan Detroit area. At the urging of her supervisor, she applied to the University of Michigan's School of Library and Information Science, where she earned her M.I.L.S. in 1990.

Margaret, also called Meg, will always be remembered by her MDMLG colleagues and friends as a hard-worker with a positive disposition who was always willing to volunteer for committees and other service work. She was a member of MDMLG's Nominating Committee for two years (2020-2021 & 2021-2022), Chair of the Programming and Professional Development Committee (2021-2022), and served as President from August 2022 until her recent passing. She added a seasoned depth of insight, as well as a touch of humor, to our association discussions. She will be so missed by all of us.

At this time, there are no formal services planned. However, should any plans be announced, they will be communicated to the MDMLG membership.

Respectfully,

Elizabeth Bucciarelli

## WINTER GENERAL BUSINESS MEETING

Join us January 25th for our winter general business meeting from 1pm–1:45pm. Following the meeting, we will host a program titled "When Information Disorder Meets Health Librarianship." To register for the program, please complete the [Online Registration Form](#).

The tentative agenda is as follows:

1:00–1:45pm	Business Meeting
1:45–2:00pm	Break
2:00–3:30pm	Program

## MDMLG WINTER PROGRAMMING

Join us after the business meeting on January 25th for our winter programming, **“When Information Disorder Meets Health Librarianship,”** a presentation by Sara Memmott of Eastern Michigan University and Katie Greer of Oakland University.

Problematic content has evolved beyond simple misinformation to information disorder and conspiracy theories that are detrimental to our society. In this presentation, Sara and Katie will discuss how to understand these challenging issues, share examples of medical conspiracies from a nationwide survey of librarians who have encountered conspiracy theorist patrons, and provide strategies to use with patrons.

Presenters:

- **Sara Memmott**, Associate Professor, Social Work Librarian & Co-coordinator of Information Services, Eastern Michigan University
- **Katie Greer**, Associate Professor & Fine/Performing Arts Librarian, Oakland University

## MDMLG STUDENT SCHOLARSHIP AWARD

Each year, MDMLG offers a scholarship award to students enrolled in the Wayne State University School of Information Sciences or the University of Michigan’s School of Information who display an enthusiasm for health sciences librarianship. The award includes \$250, a certificate, and an invitation to attend the Annual Summer Program. Responsibilities include representing MDMLG and promoting health sciences librarianship.

Wayne State University student **Sarah Marks** has been chosen as the 2022 winner of the MDMLG Student Scholarship. Sarah is currently working as a Medical Lab Scientist and has more than a decade of experience in healthcare. Sarah will also serve as MDMLG Student Representative.

To honor our late President Margaret Danowski, the scholarship award will be known as The Margaret Danowski Student Scholarship Award, and the award amount will increase to \$350. The 2023 window opens in September, and a winner will be chosen by the end of October.

## UPCOMING EVENTS

Upcoming events and activities relevant to MDMLG members.

**January 25:** MDMLG Winter Business Meeting, 1pm virtual (email President for Zoom link)

**January 25:** MDMLG Winter Programming event, 2pm, virtual (email President for Zoom link)

**January 26:** NNLM Class: Effective Health Communication and Health Literacy: Understanding the Connection, 1pm, virtual ([Click here for course page](#))

**January 27:** NNLM Class: MeSH Changes and PubMed Searching 2023, 1pm, virtual ([Click here for course page](#))

**February 8:** MLA Webinar: All You Need to Know to Do an MLA Systematic Review Webinar, 2pm, virtual ([Click here for webinar page](#))

**May 16-19:** [Medical Library Association Annual Meeting](#), Huntington Place, Detroit, MI (visit [website for pricing](#))

## **JOIN US IN DETROIT FOR MLA/SLA '23!**

By LaVentra E. Danquah

The Medical Library Association is hosting its annual conference in Detroit this year, May 16-19, celebrating its 125th anniversary in a first-ever collaboration with the Special Library Association. This first-of-its-kind event will bring together experts and professionals from across the field to share their knowledge and insights, network with new and old colleagues, and learn about recent advances in medical and special librarianship.

Attendees will be able to engage in a variety of stimulating sessions, as well as hear from industry leaders and experts on the latest trends, innovations, and best practices. Gain new perspectives and learn about cutting-edge tools and technologies that can help you excel in your work.

Detroit offers several opportunities for entertainment and recreation too! Secure your spot and join us in May 2023 in the heart of downtown Detroit for an unforgettable conference experience.

MLA/SLA 2023 Conference website: <https://www.mlanet.org/page/mla23-home>

*LaVentra E. Danquah is the director of Shiffman Medical Library at Wayne State University and chairs the Local Arrangements Committee (LAC) for MLA/SLA '23, a group of local and regional librarians coordinating local events and services for MLA/SLA '23 visitors to Detroit. Please [contact](#) LaVentra to participate in the MLA/SLA '23 LAC.*

## **LAVENTRA E. DANQUAH NAMED DIRECTOR OF SHIFFMAN MEDICAL LIBRARY**

MLA/SLA '23 Local Arrangements Committee chair LaVentra E. Danquah has been named director of Wayne State University's Vera P. Shiffman Medical Library and the Eugene Applebaum Learning Resource Center. LaVentra has been acting as the interim director of Shiffman since 2019.

Read more about LaVentra and her career here: <https://tinyurl.com/DanquahLE>

*Image Credit: "Detroit Skyline" by Bryan Debus via Flickr, under CC-BY-ND 2.0 license.*

**A number of MDMLG members are active in the MLA/SLA '23 Local Arrangements Committee, helping out with hospitality, dine-around events, volunteer coordination, blog posts, and more. Here's how you can be involved:**

- Contact [LaVentra Danquah](#) to participate in the Local Arrangement Committee.
- Volunteers receive partial admission to MLA/SLA '23! Volunteers are needed to assist with areas such as hospitality or on-site logistics.
- MDMLG members **David Stewart** and **Stephanie Swanberg** are contributors to the MLA/SLA '23 blog, helping to [welcome visitors to Detroit](#) and share a bit of [its history](#).
- The window for submissions closes on January 26, 2023. Posters and Lightning Talks are great ways to share information about research or programs. Submit your poster or talk [here](#).
- MLA member presenters who will be attending MLA '23 in person in Detroit may be eligible for a \$75 in-person registration discount.
- MLA pricing can be found [here](#).

## HIDDEN GEMS FROM THE NLM BOOKSHELF

By Colleen Streeter

*This article was first published on the Henry Ford Health Sladen Library blog on January 9, 2023.*

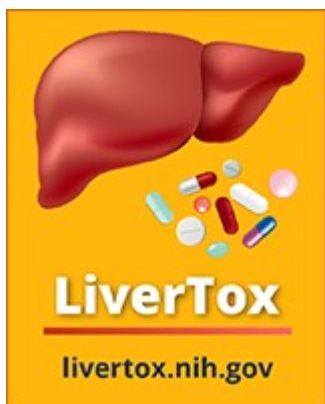

The National Library of Medicine (NLM) provides numerous biomedical resources. One that may come to mind first is PubMed. A less commonly known resource is the [NLM Bookshelf](#). Bookshelf provides free online access to books and documents in life science and healthcare. There are more than 9,000 titles, including classic textbooks, monographs, reference books, systematic reviews, technical reports, clinical guidelines, web materials, grey literature, and other peer-reviewed documents. There are even a few specialty drug databases: **LactMed** and **LiverTox**.

The [LactMed](#) database contains information on drugs and other chemicals to which breastfeeding mothers may be exposed. It includes information on the levels of such substances in breast milk and infant blood, and the possible adverse effects in the nursing infant. Suggested therapeutic alternatives to those drugs are provided, where appropriate. All data are derived from the scientific literature and fully referenced. A peer review panel reviews the data to assure scientific validity and currency.

Users are able to:

- Search by drug class or a specific drug name.
- Easily find the date a drug record was last updated.
- See suggestions for alternative drugs.

[LiverTox](#) provides easily accessed information on the diagnosis, cause, frequency, clinical patterns, and management of liver injury attributable to prescription and nonprescription medications and selected herbal and dietary supplements. The LiverTox site is meant as a resource for both physicians and patients as well as for clinical academicians and researchers who specialize in idiosyncratic drug-induced hepatotoxicity.

- Users can search LiverTox with a drug name or drug class.
- LiverTox links out to other NLM resources with additional information, like PubMed and PubChem.
- Includes case studies for specific drugs.

## MIRL RECORDING NOW AVAILABLE

The full Medical Institutional Repositories in Libraries (MIRL) 2022 Symposium is now available for streaming on YouTube. Visit [youtube.com/@MIRLSymposium](https://youtube.com/@MIRLSymposium) or [hsrc.himmelfarb.gwu.edu/mirl](https://hsrc.himmelfarb.gwu.edu/mirl) to view various presentations on managing institutional repositories in medical libraries, including a keynote presentation by the National Library of Medicine's Dr. Lisa Federer on the new data policy at the National Institute of Health.

Anyone interested in participating in MIRL '23 is encouraged to [email Steven Moore](#).

## NEW OPEN ACCESS BOOK FROM MLA

A new open access (i.e., free!) book from the Medical Library Association called *Health Sciences Collection Development: An Overview of Fundamental Knowledge and Practices, 2nd ed.* is now available.

Published by the MLA Collection Development Caucus, the second edition has a new section on unique collection genres; addresses Diversity, Equity, Inclusion and Accessibility in collections; and incorporates significant updates to and expansion of previous content; and includes a glossary. Each chapter, as applicable, lists key communities and online courses for professional development on that topic.

## RESOURCE ROUNDUP

### A RECAP OF RECENT REVISIONS TO RX RESOURCES

**PubMed:** Proximity searching is now available! Get closer to the heart of your search topic with these tips from the National Library of Medicine: <https://tinyurl.com/PubMedProximity>

One example of a proximity search: "health librarian"[Title/Abstract:~3]

**NIH Preprint Pilot:** The National Library of Medicine is extending beyond its Covid-19 policy to eventually include all preprint publications that are reporting on research funded by the National Institute of Health. Learn more about the preprint pilot here: <https://tinyurl.com/NIHPreprints>

**MeSH 2023:** More than 1,700 terms describing federally recognized *American Indian and Alaskan Native* tribal names and ethnic/ethnolinguistic minority terms are now mapped as newly created SCR type 5, designated as "Population Groups." Additionally, terms related to *Social Determinants of Health* have also been updated.

*Have an update? Share it with the Newsletter Committee for inclusion in the next newsletter.*

## JOB POSTINGS

Library Director, **Cleary University** (posted May 2022)

## FOR YOUR LISTENING PLEASURE: PODCASTS

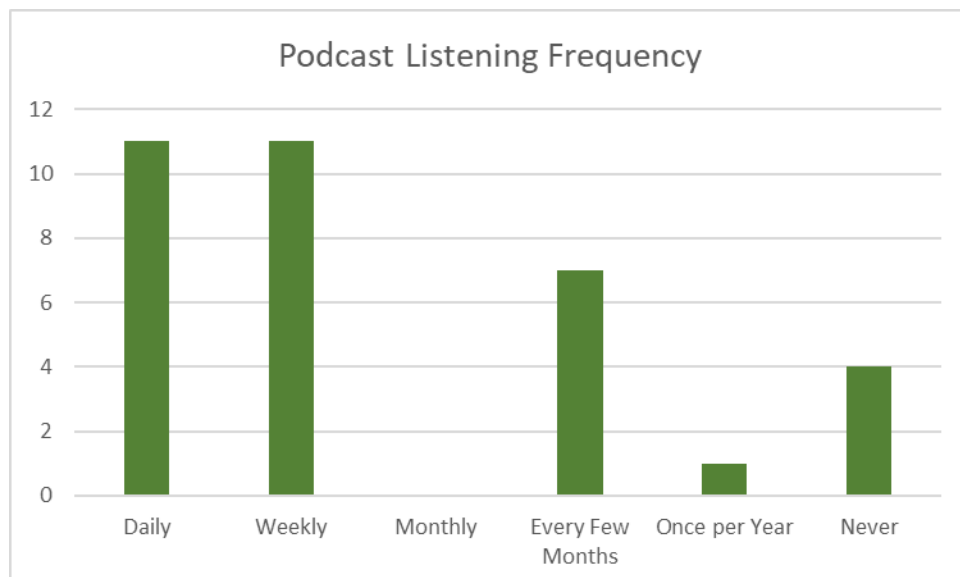

By Jill Turner

“At last”—I can hear Etta James singing in my head—we have the long-awaited results from the podcast survey that I conducted in the fall. This was a fun project that had, I admit, an ulterior motive: I was looking for suggestions for my own listening pleasure. The small handful of podcasts that I was listening to were suggestions provided by two of my colleagues at the University of Detroit-Mercy Dental Library, so I figured the general MDMLG community would probably have some great suggestions as well. And I was right. I want to thank those (n=33) who submitted responses. I had a great time combing through the results. Participants were not required to provide their names, although they could if they wanted. For those that did, I was fascinated to see where your interests lay.

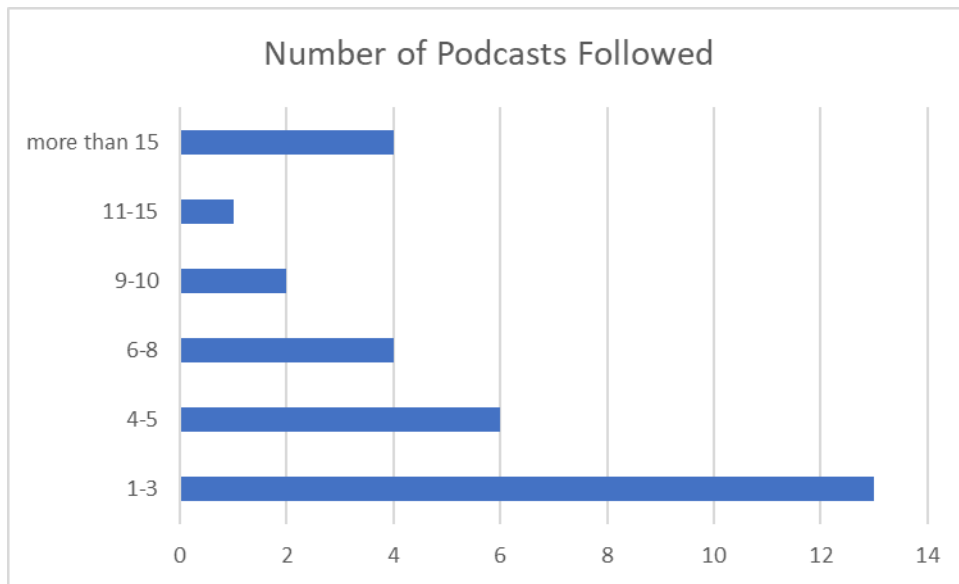

### Results

Q: *Do you ever listen to podcasts?* Twenty-nine participants indicated they have listened to podcasts while four stated they did not. Those that were not podcast listeners provided a few reasons why: podcasting is not a medium that worked for them; they have no interest in the format, along with a knowledge deficit regarding podcast technology and content; and the final comment indicated the respondent had “no need to”.

**Q:** *How many podcasts do you follow?* The majority of participants (39%) indicated they follow from one to three podcasts, and an ambitious 12% (4) follow more than 15. The graph below shows the complete results.

**Q:** *What do you like about listening to podcasts?* Respondents (n=29) listed a variety of reasons why they enjoy podcasts. The following word cloud depicts the essence of the responses overall, along with the vagaries of word clouds (see “things”).

## FOR YOUR LISTENING PLEASURE: PODCASTS (CONTINUED FROM PG. 9)

By Jill Turner

After a bit of light thematic analysis, ten themes emerged. The top four mentioned most frequently included, in descending order: distraction or entertainment while performing other tasks, education/information, nominal time investment, and interesting topics and subjects. The top reason, with 15 mentions, participants enjoy listening to podcasts is because they can “listen and learn while doing things that don't take up brain space,” like driving, walking, and laundry. The next highest reason, with 11 mentions, was education and information. One participant wrote they like the differing topics along with “get[ting] informed” and “look[ing] at things in different points of view”. Others mentioned they enjoyed listening to “deep dive discourse” on their topics of interest and gaining a better understanding of the celebrities as people. Nominal time investment received 5 mentions with respondents writing “the length of most podcasts (30-60 minutes) fits my available time”, and “I'm not investing as much time as say listening to an audiobook”. Finally, 3 participants enjoy podcasts because of the variety.

One wrote “listening to the radio doesn't allow for that kind of selection & control”. Other reasons submitted included entertainment, free access, relaxing, immersive, and podcast host enthusiasm (e.g. “I enjoy the host's nerding out about music”).

The most surprising result of this survey for me was confronting my preconceived notions about those who responded to the survey and MDMLG members themselves. I assumed, because I sent the survey link out on the MDMLG listserv, that all of the respondents would be medical/health sciences librarians. It occurs to me now that this may not be the case. I probably should have asked on the survey. Oh well. Secondly, I fully expected that the majority of those who responded would listen to medical podcasts for entertainment. In reality, very few do. I am a definite minority among this group in this regard. I have a nerdy fascination for medicine and medical history – but I have learned from this survey that this does not mean other medical librarians do. Many of you are probably more than happy to leave “work” behind as you walk out of the library or office.

As previously stated, I loved discovering my friends and colleagues' hobbies and interests. MDMLG is an eclectic bunch, as evidenced by the responses to the final question: *What podcasts do you follow? Please list the titles, the genre or subject, and briefly, why you have chosen to listen* (n=28). Not everyone supplied podcast names; some only listed genres. I used Apple Podcast's classifications when sorting the podcasts by subject. There were a few exceptions; video games got their own classification, separate from Apple's label of “Leisure”. Additionally, if the podcasts were not available on Apple, I assigned my own subject classification.

A few participants apologized for their listening selections, supposing they would not be of interest to the MDMLG community. I disagree. As this survey shows, we have wide and varied interests. For example, one respondent included crime fiction podcasts along with a design and architecture podcast in their playlist.

The next page contains a table with a summary of the responses on our podcast habits, including the most common types/genres, how many of our members listen to the genre, and the most popular podcasts within that genre. A list of individual podcasts that our membership listens to will be shared in the next issue of the MDMLG Newsletter, so stay tuned!

Genre	Number of Unique Listeners	Popular Podcasts among MDMLG Members
Comedy	11	Conan O'Brien Needs a Friend (2); Smartless (2); Comedy Bang Bang; Armchair Expert; Why Is This Happening?
TV, Film, or Music	7	The Delta Flyers; Drama Queens; Everything Iconic; The Good Place; Oddcaste; The Next Picture Show; Sound Opinions
Science	7	Hidden Brain (3); This Podcast Will Kill You (2)
Literature	6	What Should I Read Next? (2)
True Crime	5	My Favorite Murder (2)
News/Current Events	5	Daily Wire (2)

## HISTORY OF MDMLG

The Metropolitan Detroit Medical Library Group (MDMLG) can trace its roots to the Biological Sciences Group established by the Michigan Chapter of the Special Libraries Association in 1946. It existed primarily as a social group until the mid-1950s when the members began to experiment with various projects. During the 1960s, several plans came into fruition including the production of a serial locator tool, the creation of a union catalog of monographs, and the establishment of an active interlibrary loan network. The group began the process of formal organization and chose its current name in 1970.

For more on MDMLG, its history, and current activity, visit [mdmlg.org](http://mdmlg.org).
